Projects

1. Project Title: The Gift Spot (Ecommerce Website)

Description: The Gift Spot is an ecommerce platform specializing in customizable gifts. It allows users to browse, and purchase a variety of products. My role includes developing and managing the backend, implementing shopping cart functionality, handling user authentication, and ensuring smooth order processing.

Technologies Used: [Frontend: HTML, CSS, JavaScript, jQuery | Backend: PHP, | Database: MySQL | Other Technologies: LocalStorage (for cart management)]

Features:

User Authentication & Order Tracking – Enables account creation, login, and real-time order status updates.

Shopping Cart & Wishlist – Allows users to add products to a cart or save items for future purchases.

Admin Dashboard – Provides a panel for managing products, orders, and customer queries efficiently.

2. Project Title: Blood Bank Management System

Description: The Blood Bank Management System is a web-based platform that facilitates blood donation and transfusion services. It connects donors, recipients, and blood banks, ensuring a seamless and efficient blood donation process. My role includes developing and managing the backend, implementing donor and recipient registration, integrating search functionality for available blood groups, handling user authentication, and ensuring secure and efficient transaction processing.

Technologies Used: [Frontend: HTML, CSS, JavaScript, jQuery | Backend: PHP | Database: MySQL | Other Technologies: LocalStorage (for session management.)]

Features:

Donor Registration: Allows users to register as blood donors with their blood type and contact details.

User Authentication: Secure login and authentication for donors, hospitals, patients and administrators.

Blood Availability Pie Chart – Displays a visual representation of available blood units using a pie chart, helping users and administrators quickly assess stock levels.

Additional Information

Languages: English, Hindi, Marathi, Kannada.

Certifications: Foundation of AI and ML, Wordpress Development.

Other Activities: Participation in coding composition.

Hobbies: Gaming, Listening Music, Puzzles Solving
